

CASE STUDY

When our client needed full visibility into their contingent workforce processes and data management, DAHL's MSP solution was key in achieving operational efficiencies and alignment with industry best practices.

We know how to create a **partnership of success** for the bottomline.

Background and Challenges

- HR/Talent Acquisition teams overwhelmed in managing both FTE and CW hiring
- Too many IT suppliers, no structure set in adding new suppliers
- Lack of rate management process
- Lack of real time visibility into contingent labor
- Inconsistent supplier contracts, no audit processes
- Cumbersome invoicing process

The Solution

- Combined MSP/VMS solution with APRU, including our Payroll Services and Talent Team divisions
- Information Technology was the pilot group in this phased approach
- Leveraged support from the client's CIO who worked with DAHL at his former organization
- Drove program visibility through reporting and analytics
- Developed an interface process to streamline invoicing
- Consistent supplier contracts and audit processes implemented

The Results

- DAHL's dedicated program professionals eased the administrative burden from the client's HR/Talent Acquisition team (soft dollar savings)
- The client has leveraged our team for visibility into requests to add suppliers and has a business justification process in place.
- Rate management process brought bill rates into conformance and analyzed against market dynamics saving our client (15% in hard dollar savings).
- Streamlined and reduced errors in time entry and invoice/payment process
- Risk mitigation realized in having consistent contract terms and audit processes in place
- In 2017, due to the success within IT, the program expanded to all departments within the client organization
